CFS Promotions Unit Report 2013

The CFS Promotions Unit is now into its 19th year of operation, and continues with its original charter of:

- Promote the volunteer nature, role and size of the CFS
- Support the members of the CFS
- Educate the public on
 - The operational activities of CFS members (Road Crash Rescue / Rural Fires / Structure Fires / Hazardous Materials Spills/ Natural Disasters)
 - The support roles of CFS HQ and volunteers (eg: Bushfire Prevention & Public Safety Education)
- Encourage new recruits to join the service
- Demonstrate the commitment of CFS volunteers to serving their community
- Gain public support for the CFS volunteers and organisation

Website

The CFS Promotions Unit website, as in previous years, has continued to grow. The site now takes up more space (almost 1000 Meg) and has again received more visitors to the site than in previous years

The site continues to hold the most up to date information about CFS appliances and brigades around the state, with continued feedback received from staff and volunteers that the site is used as a reference point for information about appliances, stations, brigade contacts and details.

While the information is relatively up to date, we are always seeking input from brigades and groups to ensure it is correct as it can be. Thanks goes to those brigades and individuals who have provided photos and updates – no matter how small that update might be. It all goes towards keeping the site current.

As in previous years, several CFS and MFS staff have been very helpful in providing photos and information to update the site - thanks to all those who have assisted.

Our photo collection continues to grow. It has been a busy year, particularly for fires, and we have managed to get to many of them, or have people send us their own photos. We have many photos from many of the larger fires including Coomunga, Tulka, Marcollat, Bundaleer Forest, Kentbruk (in Victoria) Rockleigh, Coxes Scrub and Cherryville. In addition, we have taken thousands more photos at smaller incidents across the state. Due to time constraints, we have been unable to get to the State Training Centre very often to take photos at training courses, but we hope to be able to photograph some courses this year. We have, however, been able to attend the Region 2 Field Day in September 2012, and the Region 3 Field Day in August 2013 – two big events, with lots of photos, as well as smaller Group Field Days at Strathalbyn & Roseworthy. We estimate our photo collection to be over 600,000 images

Particularly as a result of the photos being on display, we receive numerous requests for photos, for use in the CFS Volunteer magazine, CFS Website, CFS annual report, brigade websites, brigade publications, CFS training manuals, University research projects, AFAC presentations, SAPol and SAAS publications, State Government Agencies, overseas and interstate fire websites and more. The images are provided free of charge.

Our Facebook page has grown, from around 200 at this time last year, to over 800 “likes” currently. We are pleased with how the Facebook page has grown, as an adjunct to the website. The number of Twitter followers has remained steady since last year.

Cameras

We haven't purchased any new cameras this financial year, however, we may need to purchase a new one this year (and within our budget), as one of our current cameras is suffering from overuse!

We currently have two cameras placed with CFS members at Littlehampton & Naracoorte, and are keen to find other people around the state who would like to take photos for us, with which to place a camera.

Promotions Unit vehicle

CFS HQ continues to support the unit through the Promotions Car 1 – a 1995 Toyota 80 series Landcruiser, which was formerly a Group vehicle. CFS HQ has allocated this vehicle for the use of the Promotions Unit, and covers the maintenance costs of the vehicle, while the Promotions Unit budget pays for the fuel.

This vehicle has enabled us to travel extensively over the last 12 months, including onto many firegrounds, getting to areas that we wouldn't be going in our own vehicle.

Thanks to CFS HQ for the use of this vehicle, and we hope that the support will continue.

History Project

Our history project continues, although there is perhaps not a lot of new information added to our site.

We are still working on our appliance history, and adding information and photos on appliances, as we gain the information, and have the time to upload it! We are still on the first phase of this project, which aims to record every vehicle (including trailers) that CFS & EFS has ever had. The information we are endeavouring to show includes make of vehicle, chassis year, builder, pump / pump motor, registration number(s), date when it arrived, and left a brigade, and where it went from the brigade. We are trying to include one photograph of each vehicle. We have around 5300 CFS / EFS entries so far, and are still working through our photographic collection, and various data sources we currently hold. We are also seeking information and photographs from CFS members (past & present) as well as members of the public, who may be able to assist.

We haven't been able to work on the second phase of the appliance history project, which aims to include multiple, and larger images of those appliances. This requires new programming to be done – something we haven't had the time to do!

Special thanks must go to Steve Schueler for his assistance with data & images for this phase of our history project.

We have also been working on collating information on brigade & Group histories – including when they were formed / closed, members of the brigade, stations the brigade has had / utilised, and activities of the brigade. A small amount of this information is on the web, while we continue to collate this data.

We have been fortunate to have some invaluable work done by Strathalbyn members Graeme & Lorraine McVitty. They have been researching and collating information on a number of brigades. This information has not yet been loaded to the website, as we need to undertake further programming on the site, however, it will be added in the future. Thanks Graeme & Lorraine.

We welcome information and images from CFS members, and members of the public to assist with this project.

Budget

The Promotions Unit continues to receive a budget from CFS, through the CFSVA. While this budget has not increased for some time, the budget does adequately cover all of our expenses, and we are pleased that the funding has continued.

The issuing of credit cards to each of us for Promotions Unit expenses has made things easier for us, by not having to pay for Promotions Unit items, and then claim reimbursements.

We expect our expenses over the coming year to include the following:

Recurrent expenditure:

- Internet access
- Fax line
- Website hosting
- Domain registration
- Fuel
- Insurance
- Travel Reimbursement (travel undertaken by others, on our behalf)
- Trailer Registration
- Stationery & consumables (eg camera memory cards, batteries, postage)

Other costs

We are looking at potentially purchasing the following, to upgrade existing equipment, as the budget allows

- Camera (approx. \$2500)
- Computer tower (\$1000)
- Display Boards (\$2500)
- Printing display photos (\$800)

We are looking at undertaking a trip to Kangaroo Island, to update our photographs, as the bulk of our images are over 6 years old.

We estimate the cost of the trip as follows

- Ferry \$434
- Accommodation \$360

There may be additional, and unplanned costs, in relation to incidents and activities that we don't yet know about – that is travel to an incident (such as with a strike team somewhere in the state), and accommodation if required, or planned (but as yet unknown) events such as station openings, brigade or group activities, where overnight accommodation is required, due to the distance. This is difficult to estimate, however, we don't expect this to be more than \$500.

Conclusion

The website is an ever growing, and ever changing beast. There is rarely a day that goes by without at least something being updated on the website – some days only small updates, other days significant or large scale changes.

Time to work on the site, attend incidents & activities to take photos, as well as our own paid work, looking after our two Junior members, and our own brigade responsibilities makes for a very busy time!. At times, it means that there is a delay in being able to sort, and upload photos we have taken, to the site, especially in a busy year, however, they eventually get there.

Thanks to all those who have contributed to the CFS Promotions Unit website – from those who regularly supply photos and information, to those who update their brigade information once a year, and to those who look at the site – without all of you, the site would not exist.
