

**WHS Committee Report**  
**11<sup>th</sup> October 2022**  
**CFSVA AGM**

What a 12 months!

Sitting as chair of the state committee certainly has been an interesting ride and the frustration for the committee of not having a committed rep from the leadership group has led to much frustration amongst members to get things moving in the right direction and actions closed off in a timely manner

I believe that this hopefully has and will change with new directors that have been appointed to take up the roles and become responsible and accountable for any actions that require to be done

With the new chief having sat in some of the meetings he has an understanding that this is the only legislative committee within CFS and therefore needs to be treated accordingly

Still believe there is gaps within reporting between committees with regards to information flow but hoping that this will change

The state committee is very committed to the welfare of the volunteer, and this shows with members electing to go on sub committees eg p2 masks

We did lose our newly appointed safety co-ordinator (Kevin Mooney) after a short stint and in his time there presented himself as being a get up and go sort of person and was committed to his position
